OBJECTIVE

Hi I'm an undergrad aspiring information science student looking for interships.i love and enjoy learning new computing skills and building himself not only as good programmer to code real-life problems but also to be a better human being. Rohit has a great passion to explore deep into engineering, statistics, power of technology, Artificial intelligence and Machine learning. Here, I'm trying to build a good connection with people working professionally and studying related to field computers and technologies, so I can gain knowledge and collaborate.
